

Recombinant Bovine Uteroglobulin/CC10

Description

| | |
|----------------|-------------------------------------|
| Source | Expressed in <i>E. coli</i> |
| Form | Disulfide-linked homodimer, E22-A91 |
| Molecular Mass | 7.6 kDa (monomer) |

Specifications

| | |
|-------------|---|
| Purity | >95% by SDS-PAGE |
| Endotoxin | <1.0 EU per 1µg by the LAL method |
| Activity | Comparable to recombinant human CC10 by <i>in-vitro</i> assay. |
| Formulation | Sterile, 1mg/ml in PBS (20mM NaH ₂ PO ₄ , 150mM NaCl, pH 7.4) |

Storage

| | |
|---------|---|
| Storage | Store at 4-8°C; We do not recommend freezing due to loss of activity. |
|---------|---|

5µg of the product was resolved by SDS-PAGE under reducing or non-reducing conditions and stained with Coomassie R-250.

- 1) Molecular weight marker
- 2) Bovine uteroglobulin, reducing conditions
- 3) Bovine uteroglobulin, non-reduced
